

TXAMPumps

PTP2500

The TXAM PTP2500 series is the entry level offering in our line of pneumatic pumps. It is made with stainless steel wetted parts and operates off natural gas or compressed air.

The stroke length can be easily adjusted with the built-in stroke adjustment knob. Along with the pneumatic timer to control stroke speed, you can precisely control your injection rates.

Please contact your local TXAM sales representative for more details.
