REMOTE POWER SOLUTIONS

The TXAM Remote Power Solutions is your engineered solution to portable solar & wind power stations. This fully customizable portable power station is designed to operate with wind, solar, or propane as back-up. Dual axis tracking solar panels follow the path of the sun to optimize power, and can be customized to suit your needs. The wind generator is a 12V DC, Microprocessor-based smart controller featuring a fin dump load heater, PMA/PMG alternator, with a sustained survival wind speed of up to 110MPH.
