

## TXAM Pumps Multipoint Injection System

TXAM's multipoint injection system allows you to treat multiple injection points, at different rates, utilizing only one TXAM pump. In addition to cutting down on pump, solar, and tank costs, TXAM's Universal Pump Controller (UPC) offers automation and remote control features to optimize your chemical program. TXAM offers a diverse product line of standard multipoint injection skids, with the capability of custom tailored skids.

### Features

- Up to 16 Injection points
- Modbus Control
- Temperature Control
- Pump Inhibit Input
- Analog Input

### Applications

- Multi-Well Pads
- Methanol Injection
- AC, DC (Solar), and Brushless DC
- Hazardous Areas (Class 1 Div 2)
- Multiple Skid Designs

### Specifications

Power Source	12VDC / 120VAC
Modbus RTU	RS 485
Inputs	(1) Analog (1) Discrete (1) Temperature Input
